# **Academic Program and Course Description Guide**

**2024**

## **Introduction:**

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

## Concepts and terminology:

**Academic Program Description:** The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

**Course Description:** Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

**Program Vision:** An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

**Program Mission:** Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

**Program Objectives:** They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

**Curriculum Structure:** All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

**Learning Outcomes:** A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

**Teaching and learning strategies:** They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

## 14 Program Development Plan

### Program development plan

The curriculum denies taking into account students' inclinations, trends, needs, and problems. The curriculum should be adapted to the students' present and future, and there should be a compatibility between learning .methods and the characteristics of students' growth

The teacher must have an influential personality on his students, because the student is influenced – first – by the teacher and the professor

Being proficient adds a special style to the student's personality in .teaching

Periodic (annual) updating of approved training plans

Developing the curriculum vocabulary by (20) modern topics in line with the developments of the times for the purpose of properly preparing the student professionally, educationally and psychologically

### 11. Course Evaluation

The annual grade consists of two components:

1. **Yearly Grade (40%):** This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade.
2. **Final Exam Grade (60%):** The final exam contributes 60% to the annual grade.

To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example:

$$\text{Annual Grade} = (0.4 * \text{Yearly Grade}) + (0.6 * \text{Final Exam Grade})$$

This formula combines the weighted percentages of each component to determine the student's overall annual grade.

## 11. Course Evaluation

The annual grade consists of two components:

- Yearly Grade (40%):** This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade.

- Final Exam Grade (60%):** The final exam contributes 60% to the annual grade.

To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example:

$$\text{Annual Grade} = (0.4 * \text{Yearly Grade}) + (0.6 * \text{Final Exam Grade})$$

This formula combines the weighted percentages of each component to determine the student's overall annual grade.

## 11. Course Evaluation

The annual grade consists of two components:

- Yearly Grade (40%):** This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade.
- Final Exam Grade (60%):** The final exam contributes 60% to the annual grade.

To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example:

$$\text{Annual Grade} = (0.4 * \text{Yearly Grade}) + (0.6 * \text{Final Exam Grade})$$

This formula combines the weighted percentages of each component to determine the student's overall annual grade.
