Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Descripti

Introduction:

The educational program is considered a coordinated and organized package of academic courses that include

es procedures and experiences organized in the form of academic vocabulary, the main purpose of which is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program .The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that students are working to acquire based on the objectives of the academic program. The importance of this description is evident because it represents the cornerstone of obtaining program accreditation, and the teaching staff participates in writing it under the supervision of the scientific committees in the scientific departments .This guide, in its second edition, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the latest developments in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, quarterly), in addition to adopting the description of the academic program circulated according to the book of the Department of Studies 3/2906. On 5/3/2023 with regard to programs that adopt the Bologna Process as a basis for their work. In this area, we can only emphasize the importance of writing descriptions of academic programs and courses to ensure the smooth conduct of the educational process.

Concepts and terminology:

Description of the academic program: The description of the academic program provides a brief summary of its vision, mission, and objectives, including an accurate description of the required learning outcomes based on their selection and specific learning.

Course Specific: Provides a necessary summary of the most important course characteristics and learning outcomes that the student can achieve demonstrably if he is able to make the most of the available learning opportunities. She is horny from the description of the program.

The program vision: an ambitious picture of the student's academic future, an advanced, motivating, realistic, and predictable program. The overall message: sufficient and the resources needed for it to be specific, as well as determining the paths and directions of the project. Program objectives: These are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable. Curriculum structure: All courses/study subjects included in the academic program according to the approved learning system (semester, annual, Bologna track), whether it is a requirement (ministry, university, college, or scientific department), along with the number of study units. Learning outcomes: A consistent set of knowledge, skills, and values that the student has acquired after the successful completion of the academic program. The learning outcomes for each course must be determined in a way that achieves the program objectives. Teaching and learning strategies: They are the strategies used by the faculty member to develop the student's teaching and learning, and they are plans that are followed to reach the learning goals. That is, it describes all curricular and extracurricular activities to achieve the learning outcomes of the programmer.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are

followed to reach the learning goals. They describe all classroom and extra-

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

١٤٢. Program Vision

It is clear that the progress and development of societies are achieved through the programs of their scientific institutions. This is accomplished by formulating policies for these societies in various fields. The vision of the College of Education for Humanities is to create a working guide for all community institutions through its programs,

serving as a reference for these institutions. It aims to provide scientific experiences to its students, qualifying them to undertake the duties assigned to them using the technologies used in prestigious international universities. This will position community institutions at a level comparable to those in developed countries around the world.

١٤٣. Program Mission

The mission of the College of Education for Humanities is embodied in graduating specialized, high-quality teachers equipped with all modern technologies in the field of education. These teachers should be capable of competing in the job market, especially in the Ministry of Education. Additionally, the college aims to embrace outstanding graduates in the general specialization by supporting them in pursuing higher studies (master's and doctoral degrees) and conducting scientific research that contributes to the advancement of society and problem-solving. Furthermore, the college seeks to prepare postgraduate students to provide advanced scientific expertise to the Ministry of Higher Education and Scientific Research, addressing the need for specialized experts in Iraqi universities.

١٤٤. Program Objectives

Preparing academic personnel with a bachelor's degree who are responsible for leading the educational process in society.
 Training specialists in the use of modern educational technologies.
 Developing specialized academic staff with master's and doctoral degrees to contribute to Iraqi universities and scientific research institutions in society.
 Conducting fundamental and applied studies, and organize scientific seminars and conferences that contribute to the advancement of society.
 Instilling a scientific spirit in students to address the challenges they face and equip them with the skills to achieve this.
 Fostering innovation, creativity, and optimal utilization of students' potential, and familiarize students with constructive scientific output.
 Strengthening belief in love of the homeland, high values, and spiritual development, and promote a spirit of teamwork and democracy.
 Disseminating cultural and educational awareness in society.
 Actively contributing to the Writing of textbooks, supplementary materials, and general references .
 Actively participating in the development of relevant service departments in the governorate.
 Providing scientific expertise and advice to educational institutions in society, ensuring they keep pace with developments in their field of expertise.
 Developing scientific curricula for educational institutions in society that are equivalent to curricula in advanced countries.

Course Evaluation					
The annual grade consists of two components: Yearly Grade (40%): This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade. Final Exam Grade (60%): The final exam contributes 60% to the annual grade. To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example: Annual Grade = (0.4 * Yearly Grade) + (0.6 * Final Exam Grade) This formula combines the weighted percentages of each component to determine the student's overall annual grade.

Academic Program and Course Descripti

Introduction:

The educational program is considered a coordinated and organized package of academic courses that include

es procedures and experiences organized in the form of academic vocabulary, the main purpose of which is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program .The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that students are working to acquire based on the objectives of the academic program. The importance of this description is evident because it represents the cornerstone of obtaining program accreditation, and the teaching staff participates in writing it under the supervision of the scientific committees in the scientific departments .This guide, in its second edition, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the latest developments in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, quarterly), in addition to adopting the description of the academic program circulated according to the book of the Department of Studies 3/2906. On 5/3/2023

with regard to programs that adopt the Bologna Process as a basis for their work. In this area, we can only emphasize the importance of writing descriptions of academic programs and courses to ensure the smooth conduct of the educational process.

Concepts and terminology:

Description of the academic program: The description of the academic program provides a brief summary of its vision, mission, and objectives, including an accurate description of the required learning outcomes based on their selection and specific learning.

Course Specific: Provides a necessary summary of the most important course characteristics and learning outcomes that the student can achieve demonstrably if he is able to make the most of the available learning opportunities. She is horny from the description of the program.

The program vision: an ambitious picture of the student's academic future, an advanced, motivating, realistic, and predictable program. The overall message: sufficient and the resources needed for it to be specific, as well as determining the paths and directions of the project. Program objectives: These are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable. Curriculum structure: All courses/study subjects included in the academic program according to the approved learning system (semester, annual, Bologna track), whether it is a requirement (ministry, university, college, or scientific department), along with the number of study units. Learning outcomes: A consistent set of knowledge, skills, and values that the student has acquired after the successful completion of the academic program. The learning outcomes for each course must be determined in a way that achieves the program objectives. Teaching and learning strategies: They are the strategies used by the faculty member to develop the student's teaching and learning, and they are plans that are followed to reach the learning goals. That is, it describes all curricular and extracurricular activities to achieve the learning outcomes of the programmer.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

١. Program Vision

Program vision is written here as stated in the university's catalogue and website.

Achieving leadership and creativity through its academic programs and scientific expertise that contribute to development

٢. Program Mission

Program mission is written here as stated in the university's catalogue and website.

Evaluating scientific, educational, research and consulting services in light of the needs of the local, regional and international community and developing the balance of knowledge in the field of scientific research in order to achieve a competitive advantage with lasting creativity and high quality.

٣. Program Objectives

General statements describing what the program or institution intends to achieve.

- 1- Informing students about their scientific sources for the subject assigned to them
- 2- Informing students of the vocabulary they will study with precision and detail
- 3- Students seek the help of their professors on how to extract scientific material from its sources
- 4- Students analyze the educational program they will study
- 5- Knowing and demonstrating students' abilities and academic standings
- 6- Emphasis on linking the program with other appropriate sciences that have a close relationship with it
- 7- Expanding students' understanding of the program subjects and other programs to work on creating a model of students of the type that will be relied upon in the future to qualify for higher academic degrees and creating good researchers from them.
- 8- Preparing scientifically and morally competent teachers to contribute to raising a generation that loves development, development and prosperity of the nation.

٤. Program Accreditation

Does the program have program accreditation? And from which agency?

٥. Other external influences
Is there a sponsor for the program? University of Diyala / College of Education for Human Sciences

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

۳۱۶. Course Evaluation

The annual grade consists of two components:

۱. **Yearly Grade (40%):** This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade.

۲. **Final Exam Grade (60%):** The final exam contributes 60% to the annual grade.

To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example:

$$\text{Annual Grade} = (0.4 * \text{Yearly Grade}) + (0.6 * \text{Final Exam Grade})$$

This formula combines the weighted percentages of each component to determine the student's overall annual grade.

۳۱۷. Learning and Teaching Resources

Professional Development
Mentoring new faculty members
Briefly describes the process used to mentor new, visiting, full-time, and part-time faculty at the institution and department level.
Professional development of faculty members
1-using the method of delivery and lecture in providing students with the basics and topics related to knowledge Illustrated . 2-through the method of questioning and discussion, the study materials are clarified and explained by the academic staff 3-directing students to visit the library and the international Informatics network to obtain information and facts

٣٨٦. Acceptance Criterion
(Setting regulations related to enrollment in the college or institute, whether central admission or others) 1- Admission is central 2- The student's desire.

3– Competitive rate **between departments.**

۳۸۷. The most important sources of information about the program

State briefly the sources of information about the program.

- 1 – Books, periodicals, theses and university dissertations that meet the latest study requirements in the morphology major
- 2– International Information Network.
- 3– The personal experience of the person teaching the course.

۳۸۸. Program Development Plan

- 1– The curriculum denies taking into account students’ inclinations, trends, needs, and problems.
 - 2– The curriculum should be adapted to the students’ present and future, and there should be a compatibility between learning methods and the characteristics of students’ development.
 - 3– The teacher must have an influential personality on his students, because the student is influenced – firstly – by the teacher, and the capable professor adds a special style to the student’s personality in teaching.
- Periodic (annual) updating of approved training plans.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

٣٨٩. Program Vision

It is clear that the progress and development of societies takes place through the

programs of their scientific institutions, and this is achieved by drawing up the policies of those societies in various fields, and the vision that the College of Education for Humanities seeks to achieve is to develop, through its programs, a work guide for all society's institutions and to be a reference to which these institutions return and strive.

٣٩٠. Program Mission

The mission of the College of Education for Humanities is embodied in graduating a qualitative specialized teacher equipped with all modern technologies in the field of education to be able to compete in the labor market, especially the Ministry of Education, and to embrace distinguished graduates in the general specialty by completing postgraduate studies (Master's and PhD) and carrying out scientific research that contributes to the advancement of society.

٣٩١. Program Objectives

- 1- Preparing scientific cadres who hold a bachelor's degree who are responsible for leading the educational process in society.
- 2- Preparing specialists in the use of modern educational technologies.
- 3- Preparing specialized scientific cadres holding master's and doctoral degrees to supply Iraqi universities and scientific research institutions in society.
- 4- Conducting basic and applied studies and research, and holding scientific seminars and conferences that contribute to the progress of society.
- 5- Instilling the spirit of scientific orientation among students in addressing the difficulties they face and providing them with the skills that will help them achieve them.
- 6- Developing the spirit of innovation and creativity, optimal investment of students' energies, and accustoming students to constructive scientific output.
- 7- Consolidating belief in patriotism, ideals and spiritual values, and developing

the spirit of collective and democratic work.

8– Spreading cultural and educational awareness in society.

9– Effective contribution to writing methodological, assistance and general reference books.

10– Effective participation in developing the relevant service departments in the governorate.

11– Providing scientific expertise and advice to the educational institution in the community in a way that ensures keeping pace with developments in its field of specialization.

12– Developing scientific curricula for educational institutions in society, in a way that is parallel to the curricula in developed countries.

٣٩٢. Program Accreditation

Does the program have program accreditation? From which side?

Yes: Adopting global comprehensive education quality standards and the standards of the Association of Arab Universities in the field of education quality.

٣٩٣. Other external influences

Is there a sponsor for the program?

Yes: Ministry of Higher Education – Ministry of Education – Ministry of Tourism and Antiquities

Professional Development

Mentoring new faculty members

Urging the teaching staff to participate in development programs to familiarize themselves with the Civil Service Law, highlighting their knowledge of basic information related to public administration, learning about relevant legislation, what are the responsibilities of university professors, and providing them with the necessary skills to enable them to carry out their duties.

Professional development of faculty members

He urged the teaching staff to expand the students' understanding of the program subjects and other programs to work on creating a model of students of the type that will be relied upon in the future to qualify for higher academic degrees and to create good researchers from them, which is

the desired goal..

٤٢٨. Acceptance Criterion

The student's average in the preparatory school stage, in addition to the student's desire, as well as the geographical area of the student's residence, in line with the admission policy in Iraqi universities, colleges, and institutes.

٤٢٩. The most important sources of information about the program

References and sources from books, research, studies, periodicals, various means of communication from the Internet and others.

٤٣٠. Program Development Plan

Developing the curriculum vocabulary by 20% of modern topics in line with the latest developments of the times for the purpose of preparing the student properly professionally, educationally and psychologically.

Academic Program and Course Description Guide

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

٤٣١. Program Vision

Diyala University seeks scientific leadership, excellence and creativity in the fields

of higher education and scientific research to serve the community and enhance its local, regional and international standing to reach the highest levels of quality and international accreditation.

٤٣٢. Program Mission

Providing effective academic university education through continuous development of academic programs in many specializations in light of the requirements of development plans to serve the labor market and contribute to promoting sustainable development.

٤٣٣. Program Objectives

. Creating a stimulating environment for education and creativity through developing and updating scientific curricula and training and evaluation methods to keep pace with the requirements of the labor market

Developing the teaching and administrative staff at the university through exchanging experiences, scientific cooperation, and developing plans for the success of the educational process

Paying attention to quality assurance and academic performance to achieve quality and excellence and obtain favorable accreditation.

Graduating competent students who contribute to the development of society cognitively, economically and socially to support the public, private and mixed sectors so that they are able to compete and innovate in the labor market.

- Providing scientific expertise and advice to educational institutions in the community to ensure keeping up with developments in their field of specialization.
- Refining critical and creative thinking skills among students.
- Building partnerships with the public and private sectors by conducting studies and providing consultations in the field of specialization.

٤٣٤. Program Accreditation

Name: Assistant Prof. Qahtan Ahmed Farhood (Ph.D.) Email: qahtan.hs.hum@uodiyala.edu.iq	
٣٧٣. Course Objectives	
Course Objectives	1 – Introducing students to the sources of modern Iraqi history 2 – Students’ knowledge of the geography of Iraq and the most important influential historical events 3 Students’ knowledge of the importance of Iraq’s commercial, strategic and cultural status. 4 Informing students about social life in Iraq and the most important political and economic variables there. 5 Informing students about the most important characteristics of those who took over the administration of the provinces of Iraq during the Ottoman era. 6 Informing students about the most prominent and important stages of the development of social and intellectual life that Iraq witnessed under Ottoman control.

٣٧٤. Teaching and Learning Strategies					
Strategy		- Lecture, discussion, and presentation using the interrogative method.			
٣٧٥. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
32		Bachelor's degree Education (History)	Curriculum In sequence	Presentation and raising questions discussion	Quizzes, weekly monthly and final exams. And paper discussions
٣٧٦. Course Evaluation					
The annual grade consists of two components: ٣. Yearly Grade (40%): This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade. ٤. Final Exam Grade (60%): The final exam contributes 60% to the annual grade. To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example: Annual Grade = (0.4 * Yearly Grade) + (0.6 * Final Exam Grade) This formula combines the weighted percentages of each component to determine the student's overall annual grade.

٤٥٩. **Program Vision**

That the program contributes to students' knowledge of the most prominent Asian experiences that pushed towards increased development and positive change in those countries despite all the internal and external challenges they faced during their journey to adopt modernization as a method and vision, enabling them to absorb these cases and models and thus benefit from them in their scientific and practical careers after graduation in order to Applying all the positives in those international models reviewed during the study and then staying away from all the obstacles and negatives that occurred with previous countries and coming up with an honorable product at the level of state building.

٤٦٠. **Program Mission**

Giving a clear picture of the concept of modernization, its problems, and ways to achieve it, especially in developing countries, by reviewing some models in the regional region, which enables students to understand and comprehend those experiences.

٤٦١. **Program Objectives**

Making students able to distinguish between the concept of modernization and some other political, social, and economic terms such as growth, development, Westernization, and others, as well as enabling students to know the circumstances of the circumstances that led to the countries taken as a model for the study taking into account the causes of modernization and developing their societies, while informing students of the reasons for the success or failure of those international experiences. By scientifically reviewing her experiences according to the historical scientific method.

3. Compares the events of history	4. Enabling the student in the future to use historical sense in teaching
Ethics	
1. Adad is an enthusiastic student who loves his specialty	2. The student's love for his future profession
3. Good preparation for the student to be proficient in teaching	4. Positive interaction with students

٤٦٧. Teaching and Learning Strategies
Using a variety of teaching methods, including lecture, interrogation, discussion, information processing, and investigation.

٤٦٨. Evaluation methods
Conducting many traditional daily, monthly and quarterly tests and extracurricular activities.

٤٦٩. Faculty						
Faculty Members						
Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer
Ass.Prof. Dr. Nabeel Khalil Ibrahim	history	Modern and contemporary	Teaching		Staff	

Professional Development
Mentoring new faculty members
Holding courses to familiarize new staff with teaching methods and modern teaching techniques for use in their new academic lives.
Professional development of faculty members
Developing teaching and learning strategies, assessing learning outcomes, professional development, etc. Holding seminars and discussion panels and exchanging experiences with corresponding colleges and research centers, especially outside the country, to benefit from international expertise in the specialty and attract the most prominent researchers and writers from the specialty to give lectures and scientific seminars within the scientific institution.

٤٧٠. Acceptance Criterion
The student's average in the preparatory stage depends on the flow within the college in addition to his desire

٤٧١. The most important sources of information about the program
A large number of diverse sources, including books, research, studies, periodicals, and various means of communication from the Internet and others.

ξΥΥ. Program Development Plan

Developing the curriculum vocabulary by (20%) of modern topics in line with the developments of the times

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

2024

:the introduction

The educational program is considered a coordinated and organized package of academic courses that includes procedures and experiences organized in the form of academic vocabulary, the main purpose of which is to build and refine the skills of graduates, making them qualified to meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program

The description of the academic program provides a brief summary of the main features of the program and its courses, indicating the skills that students are working to acquire based on the objectives of the academic program. The importance of this description is evident because it represents the cornerstone of obtaining program accreditation, and the teaching staff participates in writing it under the supervision of the scientific committees in the scientific departments

This guide, in its second edition, includes a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the latest developments in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, quarterly), in addition to adopting the description of the academic program circulated according to the book of the Department of Studies, T.M.٣ /٣, ٢٩٠٦ on ٥/٣/٢٠٢٣ regarding programs that adopt the Bologna Process as a basis for their work

In this area, we can only emphasize the importance of writing descriptions of academic programs and courses to ensure the smooth conduct of the educational process

Concepts and terminology

Description of the academic program : The description of the academic program provides a concise summary of its vision, mission, and goals, including an accurate description of the targeted learning outcomes according to specific learning strategies

Course Description : Provides a necessary summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he or she has made the most of the available learning opportunities. It is derived from the program description

Program Vision: An ambitious picture for the future of the academic program to be a developed, inspiring, motivating, realistic and applicable program explains the objectives and activities necessary to achieve them, **Program message**: It briefly and also identifies the program's development paths and directions

Program objectives: These are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable

Curriculum structure: All courses/study subjects included in the academic program according to the approved learning system (semester, annual, Bologna track), whether it is a requirement (ministry, university, college, or scientific department), along with the number of study units that the student has **Learning outcomes**: A consistent set of knowledge, skills, and values acquired after the successful completion of the academic program. The learning outcomes for each course must be determined in a way that achieves the program objectives

and learning strategies : They are the strategies used by a faculty member to develop student and they are plans that are followed to reach learning goals. That is, it , and learning teaching describes all classroom activities and extracurricular to achieve the learning outcomes of the .programme

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are

followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

٥٥٧. Program Vision

Diyala University seeks scientific leadership, excellence and creativity in the fields of higher education and scientific research to serve the community and enhance

its local, regional and international standing to reach the highest levels of quality and international accreditation.

٥٥٨. **Program Mission**

Providing effective academic university education through continuous development of academic programs in many specializations in light of the requirements of development plans to serve the labor market and contribute to promoting sustainable development.

٥٥٩. **Program Objectives**

. Creating a stimulating environment for education and creativity through developing and updating scientific curricula and training and evaluation methods to keep pace with the requirements of the labor market

Developing the teaching and administrative staff at the university through exchanging experiences, scientific cooperation, and developing plans for the success of the educational process

Paying attention to quality assurance and academic performance to achieve quality and excellence and obtain favorable accreditation.

Graduating competent students who contribute to the development of society cognitively, economically and socially to support the public, private and mixed sectors so that they are able to compete and innovate in the labor market.

- Providing scientific expertise and advice to educational institutions in the community to ensure keeping up with developments in their field of specialization.
- Refining critical and creative thinking skills among students.
- Building partnerships with the public and private sectors by conducting studies and providing consultations in the field of specialization.

٥٦٠. Program Accreditation

Ministry of Higher Education and Scientific Research, Scientific Supervision and Evaluation Service, Quality Assurance and Academic Accreditation Department, Accreditation Department

٥٦١. Other external influences

Ministry of Higher Education, Ministry of Education, Ministry of Tourism and Antiquities, research centers

	90
٤٨٠.	Course administrator's name (mention all, if more than one name)
	Name: Prof. Abdul Rahman Idris Saleh (Ph.D.) Email: arahman.hs.hum@uodiyala.edu.iq
٤٨١.	Course Objectives
Course Objectives	1 – Informing students about the sources of contemporary Iraqi history. 2 – Students’ knowledge of the geography of Iraq and most important influential historical events 3 Students’ knowledge of the importance of Iraq commercial, religious and cultural status. 4 Informing students about social life in Iraq and the most important political and economic variables there. 5 Informing students about the most important characteristics of leaders and their orientations in contemporary history of Iraq.

	6 Informing students about religious life in Iraq and impact of clerics in confronting colonialism. 7 Informing students about the most prominent and important stages of development of social and intellectual life in Iraq, and the most important political parties and their impact under British control.

٤٨٢. Teaching and Learning Strategies

Strategy	- Lecture, discussion, and presentation using the interrogative method.

٤٨٣. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
32		Bachelor's degree Education (History)	Curriculum In sequence	Presentation and raising questions discussion	Quizzes, weekly monthly and final exams. And paper discussions

٤٨٤. Course Evaluation

The annual grade consists of two components:

- ١. **Yearly Grade (40%):** This portion is distributed among various activities including daily and monthly exams, preparation, daily participation, and reports. Each of these activities contributes to a total of 40% of the annual grade.

- ٢. **Final Exam Grade (60%):** The final exam contributes 60% to the annual grade.

To calculate the annual grade, you would typically determine the weighted average of the grades earned in each component. For example:

$$\text{Annual Grade} = (0.4 * \text{Yearly Grade}) + (0.6 * \text{Final Exam Grade})$$

This formula combines the weighted percentages of each component to determine the student's overall annual grade.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Program Description:

The educational program serves as a coordinated and organized package of study courses that include procedures and experiences structured into individual academic units. Its primary purpose is to build and refine the skills of graduates to make them qualified to meet the requirements of the job market. It is reviewed and evaluated annually through internal or external audit procedures and programs such as the external examiner program.

The program description provides a brief summary of the key features of the program and its courses, outlining the skills that students will acquire based on the objectives of the academic program. The importance of this description lies in its representation as the cornerstone in obtaining program accreditation, and it is jointly written by the teaching staff under the supervision of scientific committees in the academic departments.

This guide includes, in its second edition, a description of the academic program after updating the vocabulary and paragraphs of the previous guide in light of the developments and changes in the educational system in Iraq. This description includes the traditional description of the academic program system (annual, semester) as well as the adoption of the academic program description disseminated by virtue of Circular No. 3/2906 issued by the Studies Department on 5/3/2023 regarding programs that primarily adopt the Bologna process.

In this context, we cannot but emphasize the importance of writing academic program descriptions and study courses to ensure the smooth running of the educational process.

Concepts and Terminology:

- Academic Program Description: It provides a concise overview of its vision, mission, objectives, and a precise description of the targeted learning outcomes based on specific learning strategies.
- Course Description: It provides a concise summary of the most important features of the course and the expected learning outcomes for students, demonstrating whether maximum learning opportunities have been achieved. It is derived from the program description.
- Program Vision: An ambitious picture of the future of the academic program to be developed, inspiring, motivating, realistic, and applicable.
- Program Mission: It clarifies the objectives and activities necessary to achieve them briefly, as well as defining the program's development paths and directions.

- Program Objectives: Statements describing what the academic program intends to achieve over a specific period of time and are measurable and observable.
- Curriculum Structure: All study courses included in the academic program according to the adopted learning system (semester, annual, Bologna process), whether they are mandatory (ministry, university, college, and scientific department) with the number of study units.
- Learning Outcomes: A compatible set of knowledge, skills, and values acquired by the student upon successful completion of the academic program, with each course's learning outcomes specified in a way that achieves the program's objectives.
- Teaching and Learning Strategies: They are the strategies used by faculty members to develop student learning and teaching, which are plans followed to achieve learning objectives. They describe all classroom and extracurricular activities to achieve program learning outcomes.

Expected Learning Outcomes for the Program:

Knowledge:

1. Recall
2. Understanding and comprehension
3. Application
4. Analysis
5. Synthesis
6. Evaluation

Skills:

1. The student should be able to draw a diagram illustrating the teaching methods specific to the subject.
2. The student should present a research paper.
3. The student should use the data show device to present types of objective tests.
4. The student should use the historical atlas to identify dynasties and Islamic emirates.

Values:

1. The student should infer the importance of essay questions.
2. The student should analyze types of objective questions.
3. The student should realize the relationship between historical eras.
4. The student should explain the reasons for historical events.

9. Teaching and Learning Strategies:

- Lecture, discussion, and presentation with the use of questioning style.

10. Assessment Methods:

- Assigning students to prepare reports and research papers.
- Questioning students using traditional questioning methods.
- Achievement tests, oral, written, and periodic examinations.

11. Faculty Members:

Faculty Members:

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate

description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.
