Academic Program and Course Description Guide

2025-2026

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

Academic Program and Course Description Guide
2025**

Introduction

An educational program is a coordinated and organized package of courses that includes procedures and experiences arranged as individual course units. Its primary purpose is to build and refine graduates' skills, making them qualified to meet labor-market requirements. It is reviewed and evaluated annually through internal or external audit procedures, such as the External Examiner Program.

The academic program description provides a brief summary of the main characteristics of the program and its courses, indicating the skills that students are expected to acquire in accordance with the objectives of the academic program. The importance of this description lies in the fact that it represents a cornerstone for obtaining program accreditation. It is prepared by teaching staff under the supervision of the scientific committees in the academic departments.

In its second edition, this guide includes a description of the academic program after updating the components and sections of the previous guide in light of recent developments in the Iraqi educational system. It covers the traditional academic-program formats (annual and semester systems), as well as the standardized academic program description issued under the Department of Studies letter No. TM3/2906 dated 3 May 2023 for programs adopting the Bologna Process as the basis for their operation.

In this regard, the importance of preparing descriptions of academic programs and courses to ensure the proper functioning of the educational process is emphasized.

Concepts and Terminology

Academic Program Description: The academic program description provides a concise summary of its vision, mission, and objectives, including an accurate description of the intended learning outcomes in accordance with specified learning strategies.

Course Description: Provides a concise summary of the most important characteristics of the course and the expected learning outcomes to be achieved by the student, demonstrating whether the student has made maximum use of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture of the future of the academic program so that it is developed, inspiring, motivating, realistic, and applicable.

Program Mission: Briefly explains the objectives and activities required to achieve them and identifies the program's development path and directions.

Program Objectives: Statements describing what the academic program intends to achieve within a specified period and that are measurable and observable.

Curriculum Structure: All courses/subjects included in the academic program according to the adopted learning system (semester, annual, or Bologna Process), whether they are requirements of the Ministry, university, college, or academic department, together with the number of academic units.

Learning Outcomes: A coherent set of knowledge, skills, and values acquired by the student after successfully completing the academic program. Learning outcomes must be specified for each course in a way that achieves the program objectives.

Teaching and Learning Strategies: Strategies used by the teaching staff member to develop students' teaching and learning. They are plans followed to achieve learning objectives and describe all classroom and extracurricular activities intended to achieve the program's learning outcomes.

□ Paying attention to scientific research

1. Program Vision

- Spreading psychological culture in society and increasing awareness of it.
- Creating rare specializations in the educational and psychological sciences, such as measurement, evaluation, personality, health, and psychology.

2. Program Mission

- 1- Leadership in providing academic programs in the field of educational and psychological sciences to advance and build the human being as an individual for the development of society.
2. Graduating qualified cadres in the field of psychological and educational sciences and spreading psychological culture to all members of society.
3. Enhancing the intellectual, cultural and educational level of students by developing their psychological, personal, behavioral and intellectual skills to meet the requirements of the labor market and providing distinguished graduates to serve the community who help in the renaissance and development of society and confront all the challenges facing society such as pests and psychological and family diseases.

3. Program Objectives

- 1- Preparing scientific staff who hold a bachelor's degree who is responsible for leading the educational process in society.
- 2- Graduates specialized in educational and psychological sciences equipped with educational and psychological skills.
- 3- Preparing specialized scientific cadres holding master's and doctoral degrees

to supply Iraqi universities and scientific research institutions in society.

- 4- Conducting basic and applied studies and research, and holding scientific seminars and conferences that contribute to the progress of society.
- 5- Keeping up with the labor market and knowledge developments.
Empowering the student with creative and personal skills.
 - Creativity and innovation in the field of psychological sciences and confronting all psychological problems, scourges and social diseases
- 7- Focusing on the applied aspect by training students on counseling and psychological skills to prepare them on how to deal with the psychological and social problems they face.
- 8- Effective contribution to writing methodological, assistance, and general reference books.
- 9- Conducting theoretical, experimental and comparative research in the field of psychological and counseling sciences in all its branches.
- 10- Providing scientific expertise and advice to the educational institution in the community in a way that ensures keeping pace with the development taking place in its field of specialization, given the community's need for this in order to confront all social problems.
- 11- Refine critical and creative thinking skills, strengthen their personality, and focus on students' higher-order thinking skills.
- 12- Building partnerships with the public and private sectors by conducting studies and cooperating in all ways.
- 13- Providing psychological and counseling consultations in the field of specialization.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements	8	27	16.875%	—

Electronic References, Websites	
---------------------------------	--

1. Program Vision

- Modeling language use: Texts provide exposure to authentic, rich language — vocabulary, grammar, style, discourse structures.

2. Program Mission

1–. To develop students' linguistic competence — the four skills (listening, speaking, reading, writing) so they can communicate effectively in English.

1. 2–Equipping future teachers with the knowledge, skills, and methods needed to teach English effectively in schools

3. Program Objectives

1.

Develop Basic Communicative Competence

- Enable students to understand and use English in everyday academic and professional contexts.
- Focus on listening, speaking, reading, and writing at a general proficiency level.

2.

Support Academic Studies and Research

- Help students understand academic texts, papers, articles, and textbooks written in English (especially in scientific or technical fields).
- Train students to write simple reports, abstracts, or summaries in English when required.

3.

Enhance Career Opportunities

- Prepare students to use English in future teaching roles, especially as English becomes more important in Iraqi education and international communication.
- Improve employability, as many jobs now require basic English proficiency.

4.

Foster Independent Learning and Access to Global Knowledge

- Enable students to use English to access global resources (online articles, videos, courses, etc.).
- Encourage self-study and life-long learning through English

4. Program Accreditation

- The department is actively seeking program accreditation under national standards.
- It is following required procedures (self-evaluation, preparing reports, etc.).

5. Other external influences

Academic/Institutional Sponsor	The university or college that owns or hosts the program
--------------------------------	--

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements	8	27	16/:	
College Requirements *	8	27	16	
Department Requirements	32	133	82	
Summer Training				
Other				

* This can include notes whether the course is basic or optional.

7. Program Description

Year/Level	Course Code	Course Name	Credit Hours	
First year		English Texts	theoretical	practical
			100/:	

8. Expected learning outcomes of the program

Knowledge

Learning Outcomes 1	Learning Outcomes Statement 1The students will be able to
---------------------	---

	improve the basic English grammatical points and some social functions of English language skills .
Skills	
Learning Outcomes 2	Learning Outcomes Statement 2 The students will recognize the importance of learning English language skills .
Learning Outcomes 3	Learning Outcomes Statement 3The students will be able to use some social expressions in the dairy life situations.
Ethics	
Learning Outcomes 4	Learning Outcomes Statement 4 The students will respect the cultural sides of the English language
Learning Outcomes 5	Learning Outcomes Statement 5The students will respect the traditions of other communities.

9. Teaching and Learning Strategies

Teaching and learning strategies and methods adopted in the implementation of the program in general. Cooperative learning, role play ,discussion....ect

10. Evaluation methods

Implemented at all stages of the program in general. Oral and written achievement tests

11. Faculty

Faculty Members

Academic Rank	Specialization		Special Requirements/Skills (if applicable)		Number of the teaching staff	
	General	Special			Staff	Lecturer

1. Program vision

- Spreading psychological culture in society and increasing awareness of it.
- Paying attention to scientific research in the fields of mental health as a result of the compelling circumstances that society is going through.
- Creating rare specializations in the educational and psychological sciences, such as measurement, evaluation, personality, health, and psychology.

2. Program message

State the program's mission as stated in the university's bulletin and website.

Preparing a generation capable of carrying out the task of teaching and rehabilitating children with special needs

3. Program objectives

General statements that describe what the program or institution intends to achieve.

Make the student know what all types of disability are in terms of their definition and diagnosis, choose educational programs for each category of special disability, and choose educational and pedagogical means that suit each type of disability.

4. Programmatic accreditation

Does the program have program accreditation? From which side?

It is accredited by the Ministry of Higher Education and Scientific Research

5. Other external influences

Is there a sponsor for the program?

Ministry of Higher Education and Scientific Research

6. Program structure

Program Structure Number of Courses Study Unit Percentage Notes *
